## **TFR EPOXY PRIMER**

### **USES:**

TFR Epoxy Primer is used on concrete, that has been steel shot blasted, scarified or ground, as an adhesion base in preparation for epoxy overlayment and/or coating.

### **PRODUCT DESCRIPTION:**

TFR Epoxy Primer is a 40% solids, two component epoxy coating, applied prior to epoxy overlayment and under epoxy coatings to promote adhesion of the entire system. The primer is the color of the epoxy top coat that is chosen. This primer is not designed as a wear coat and should only be used with an epoxy overlayment and/or epoxy coating.
