

# PRODUCT DATA

TOLEDO FLOOR RESURFACING, INC.

## **TFR EXPANDABLE JOINT FILL COMPOUND**

### **USES:**

TFR Flexible Epoxy Joint Filling Compound is used on horizontal surfaces where severe movement has caused a void. This includes expansion joints and cracks  $\frac{1}{8}$ " wide or greater.

### **PRODUCT DESCRIPTION:**

TFR Flexible Joint Fill is an epoxy specially designed to absorb movement. The joint fill is formulated for cohesive failures, thus protecting the concrete from further damage and breakdown. Product advantages include superior vibration, impact resistance, high flexural, compressive, and bond strength.

### **PHYSICAL PROPERTIES:**

% Total Solids	- 98%
Service Time	- 10-12 hours
Elongation Factor	- 160%
Coverage	- 100 LF per gallon @ $\frac{1}{8}$ " x $\frac{1}{8}$ " x 12"
Tensile Strength	- 250-300 p.s.i.
